INDEX TO VOLUME XI.

A.

Acetylene flame, efficiency of, *Nichols*, 215.

Allen, F., Effect on the persistence of vision of exposing the eye to light of various wave-lengths, 257.

American Association for the Advancement of Science, 188.

Attenuation of Sound, *Duff*, 65.

Atwood's machine and stop-clock, *Baker*, 105.

Austin, L. W., Modification of Mance's method of determining battery resistance, 117.

B.

Baker, W. C., Description of a new Atwood's machine and stop-clock, 105.

Balance, spiral spring, *Linebarger*, 110.

Becquerel rays, a résumé, *Stewart*, 155.

Bedell, F., Young's *Electrical Testing for Telegraph Engineers*, 64.

Book reviews.

Arithmetic of chemistry, *Waddell*, 120.

Central station electricity supply, *Gay and Yeaman*, 123.

Electrical testing for telegraph engineers, *Young*, 64.

Electromagnetic theory, *Heaviside*, 60.

History of mathematics, *Fink*, 192.

Optical activity and chemical composition, *Landolt*, 191.

Ostwald's Klassiker, no. 109, 126.

Outlines of industrial chemistry, *Thorp*, 121.

Magnetic induction in iron and other metals, *Ewing*, 126.

Physical chemistry for beginners, *van Deventer*, 120.

Physics: Experimental and theoretical, *Jude*, 118.

Spirit of organic chemistry, *Lachman*, 120.

Strength of materials, *Ewing*, 316.

Text-book on physics. Sound. *Poynting and Thomson*, 124.

Theory of electrolytic dissociation and some of its applications, *Jones*, 127.

Boyle's law apparatus, *Rogers*, 112.

Boyle's law, verification of, *Williams*, 255.

Boynton, W. P., Gibbs' thermo-dynamic model for a substance following van der Waal's equation, 291.

Briggs, L. J., A new form of electrical condenser having a capacity capable of continuous adjustment, 14.

Buckingham, E., Jones' *Theory of Electrolytic Dissociation*, 127.

C.

Caldwell, G. C., Thorp's *Outlines of Industrial Chemistry*, 121.

Capacity capable of continuous adjustment, *Briggs*, 14.

Carhart, H. S., Thermodynamics of the voltaic cell, 1.

Carpenter, R. C., Ewing's *Strentgh of Materials*, 316.

Coherer, theory of, *Guthe and Trowbridge*, 22.

Condenser, electrical, having a capacity capable of continuous adjustment, *Briggs*, 14.

D.

Day, W. S., New method of measuring the resistance of a galvanometer, 251.

Dielectrics, solid, spark-length as modified by, *Humphreys*, 79.

Duff, A. W., Attenuation of sound, 65.

E.

Elasticity, effect of magnetization on the modulus of, *Stevens*, 95.

Elasticity, lecture room methods in the elementary theory of, *Franklin*, 75.

Theory of electrolytic dissociation and some of its applications, *Jones*, 127.

Boyle's law apparatus, *Rogers*, 112.

Boyle's law, verification of, *Williams*, 255.

Boynton, W. P., Gibbs' thermo-dynamic model for a substance following van der Waal's equation, 291.

Briggs, L. J., A new form of electrical condenser having a capacity capable of continuous adjustment, 14.

Buckingham, E., Jones' *Theory of Electrolytic Dissociation*, 127.

C.

Caldwell, G. C., Thorp's *Outlines of Industrial Chemistry*, 121.

Capacity capable of continuous adjustment, *Briggs*, 14.

Carhart, H. S., Thermodynamics of the voltaic cell, 1.

Carpenter, R. C., Ewing's *Strentgh of Materials*, 316.

Coherer, theory of, *Guthe and Trowbridge*, 22.

Condenser, electrical, having a capacity capable of continuous adjustment, *Briggs*, 14.

D.

Day, W. S., New method of measuring the resistance of a galvanometer, 251.

Dielectrics, solid, spark-length as modified by, *Humphreys*, 79.

Duff, A. W., Attenuation of sound, 65.

E.

Elasticity, effect of magnetization on the modulus of, *Stevens*, 95.

Elasticity, lecture room methods in the elementary theory of, *Franklin*, 75.

Electrostatic lines of force, method of studying, *Rogers*, 56.
Ewing, J. A., *Magnetic Induction in iron and other metals*, 126.
Ewing, J. A., *Strength of Materials*, 316.

F.

Ferric chloride, effect of temperature, colloidal ferric hydrate, and magnetic field on hydrolysis of, *Goodwin and Grover*, 193.
Films deposited by kathode discharge, electrical resistance of, *Longden*, 40, 84.
Fink, K., *History of Mathematics*, 192.
Franklin, W. S., Some lecture room methods in the elementary theory of elasticity, 75.
Stresses and strains in a long elastic hollow cylinder, subjected to internal and external pressure and to tension, 176.

G.

Galvanometer, new method of measuring the resistance of, *Day*, 251.
Gay, *Central Station Electricity Supply*, 123.
Gill, A. C., Landolt's *Optical Activity and Chemical Composition*, 191.
Goodwin, H. M., Hydrolysis of ferric chloride, 193.
Grover, F. W., The hydrolysis of ferric chloride, 193.
Guthe, K. E., Theory of the coherer, 22.

H.

Heaviside, O., *Electromagnetic Theory*, 60.
Humphreys, W. J., Spark-length as modified by solid dielectrics, 79.
Hydrolysis of ferric chloride, effect of temperature, colloidal ferric hydrate and magnetic field on, *Goodwin and Grover*, 193.

I.

Interferometer, forms of curves presented by, *Shedd*, 304.

J.

Jones, H. C., *Theory of Electrolytic Dissociation and Some of its Applications*, 127.
Jude, R. H., *Physics: Experimental and Theoretical*, 118.

K.

Kathode rays, development of, by ultra-violet light, *Merritt and Stewart*, 230.
Knipp, C. T., Surface tension of water above 100° C., 129.

L.

Lachman, A., *The Spirit of Organic Chemistry*, 120.
Landolt, H., *Optical Activity and Chemical Composition*, 191.
Linebarger, C. E., A new form of the spiral spring balance, 110.
Longden, A. C., Electrical resistance of thin films deposited by cathode discharge, 40, 84.

M.

Magnetization, effect of, on the modulus of elasticity, *Stevens*, 95.
Mance's method for determining battery resistance, a modification, *Austin*, 117.
Merritt, E., The development of kathode rays by ultra-violet light, 230.
Thomas Preston, 188.
Miller, G. A., Fink's *History of Mathematics*, 192.
Mixtures, spectra of, *Rollefson*, 101.

N.

Nichols, E. L., Ewing's *Magnetic Induction in Iron and Other Meta s*, 126.
Jude's *Physics: Experimental and Theoretical*, 118.
Ostwald's *Klassiker der Exacten Wissenshaften, No. 109*, 126.
Poynting and Thomson's *Text-book on Physics, Sound*, 124.
Preliminary note on the efficiency of the acetylene flame, 215.
Norris, H. H., Guy and Yeaman's *Central Station Electricity Supply*, 123.

P.

Persistence of vision, effect of various wave-lengths on, *Allen*, 257.
Photometry of glow lamps, universal apparatus for, *Sharp*, 181.
Poynting, *Text-book on Physics, Sound*, 124.
Preston, Thomas, 188.

R.

Resistance, electrical, of thin films deposited by cathode discharge, *Longden*, 40, 84.
Resistance of galvanometer, new method of measuring, *Day*, 251.
Reticles, preparation of, *Todd*, 59.
Rogers, F. J., Apparatus for demonstrating Boyle's law, 112.
Method of studying electrostatic lines of force, 56.
The M. K. S. system of units, 115.
Rollefson, C. J., Spectra of mixtures, 101.

S.

Searle, G. F. C., Heaviside's *Electromagnetic Theory*, 60.
Sharp, C. H., Universal apparatus for the photometry of glow lamps, 181.
Shedd, J. C., Forms of curves presented by the Michelson interferometer, 304.
Sound, attenuation of, *Duff*, 65.
Spark-length as modified by solid dielectrics, *Humphreys*, 79.
Spectra of mixtures, *Rollefson*, 101.
Stevens, J. S., Effect of magnetization on the modulus of elasticity, 95.
Stewart, O. M., Becquerel rays, a résumé, 155.
Development of kathode rays by ultra-violet light, 230.
Stop-clock and Atwood's machine, *Baker*, 105.
Stresses and strains in a long, elastic, hollow cylinder, *Franklin*, 176.
Surface tension of water above 100° C., *Knipp*, 129.

T.

Thermodynamic model for a substance following van der Waal's equation, *Boynton*, 291.
Thermodynamics of the voltaic cell, *Carhart*, 1.
Thomson, J. J., *Text-book on Physics, Sound*, 124.
Thorp, F. H., *Outlines of Industrial Chemistry*, 121.
Todd, D. P., Preparation of reticles, 59.
Trevor, J. E., Lachman's *Spirit of Organic Chemistry*, 120.
Waddell's *Arithmetic of Chemistry*, 120.
Van Deventer's *Physical Chemistry for Beginners*, 120.
Trowbridge, A., Theory of the coherer, 22.

U.

Ultra-violet light, development of kathode rays by, *Merritt and Stewart*, 230.
Units, the M. K. S. absolute system of, *Rogers*, 115.
Van der Waal's equation, Gibb's thermodynamic model for substance following, Boynton, 291.
Voltaic cell, thermodynamics of, *Carhart*, 1.

W.

Waddell, J., *Arithmetic of Chemistry*, 120.
Water, surface tension of, above 100° C., *Knipp*, 129.
Wave-length, effect on the persistence of vision, *Allen*, 257.
Williams, N. H., Verification of Boyle's law, 255.
Yeaman, *Central Station Electricity Supply*, 123.
Young, J. E., *Electrical Testing for Telegraph Engineers*, 64.
